Fruit Fly Trap

In places where ripening fruit is stored, fruit flies are usually not far away

When the summer is hot and the sun is shining the fruit tastes at its best. It's ripe and sweet and you always want to have a variety of your favourites at home. Unfortunately this can often have a drawback. Fruit flies also find tasty ripe fruit most attractive and will seek out your fruit wherever you hide it. When the insects settle on the fruit it will spoil quickly because the fruit

flies transfer yeasts and bacteria which will then accelerate the fruit's process of decay. To avoid this and to maintain a maximum hygiene you can use the Fruit Fly Trap from Gardigo. It is designed to attract flying insects with ultraviolet light and kill them quickly and painlessly using high voltage.

Attention! Use of the Fruit Fly Trap is only allowed in interior rooms. Using this device outdoors violates the Federal Species Protection Act!

Additional information

- **Dimensions:** 6.5 x 10.5 x 9 cm (W x H x D)
- **Packaging dimensions:** 10 x 14.5 x 6.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, CZ
- **Product images, scenery images**
- **Packaging unit:** 72 units per package

Specifications

- **Covered area:** approx. 20 m²
- **High voltage:** Grid
- **UV-LED:** 4 x
- **Power consumption:** 1 W
- **Voltage:** 220 - 240 V; 50 Hz/60 Hz
