Bird & Heron Repellent Balloon, Set of 2

Bird control without the use of electronics

Having birds in the garden is probably the most natural thing in the world. They fly around the trees and usually cause no damage to the garden. However, it is annoying when the birds begin to reap the ripe cherries and other fruit. Pigeons settling on ledges can soil your walls and patios with their droppings. A heron might decide that your garden pond is an easy hunting ground and will empty it of all fish within days. Keeping away such birds permanently from the roof or the terrace is not an easy task. Gardigo presents an eco-friendly helper! The Gardigo Bird & Heron Repellent Balloon Set contains two balloons. Inflate the 40 cm balloons, attach the stickers and the streamers. Hang the balloon onto your balcony, into a tree, onto your terrace or near your pond. You may also just let the balloon float on the pond without streaming bands.

These balloons scare the birds in order to keep your fruit trees, patios and ponds free of birds. The eye sticker will scare smaller birds such as sparrows, blackbirds, starlings, pigeons and crows. Larger birds will additionally be irritated by the hanging, glittering streamers. The Bird-Scare Balloon will cover an area of up to 40 m². The use is very simple: inflate the balloons to a diameter of approximately 40 cm. Stick the included stickers and the glittering streamers to the balloon. Then attach the string and hang it from the ceiling or tie it to a rod or branch of the tree you want to keep free of birds. When used in ponds, leave away the glittering streamers and just let the balloon float on the water.

Additional information

- **Dimensions:** Diameter approx. 40 cm
- **Packaging dimensions:** 21.8 x 26.9 cm (W x H)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
- **Packaging unit:** 80 units per package
