## Bug Repellent

Two methods, one solution

The Gardigo Bug Repellent is a versatile plug-in unit to be used against ants, mice, silverfish and other bugs and vermin. It is designed to keep your rooms free of all these pests. The device emits ultrasonic frequencies and generates an electromagnetic field that many pests find irritating. Other areas will appear more pleasant to them. Connect the device to a mains socket and it will generate an electromagnetic field within the room. The ultrasonic signal is emitted from the front of the device into the room.
