## Insect Killer Professional 70 m<sup>2</sup> 2 x 8 W

For a relaxed summer

During the summer, pesky insects get into the house quickly when opening the windows in the evening hours for a cool draught. The Insect Killer Professional is used to get rid of the insects after you are finished letting air in. It will catch flies and pesky blood suckers with ultra violet light. This is generated by two fluorescent tubes with 8 watts of power for a coverage of up to 70 m<sup>2</sup>.

Make sure to shut the windows when the device is in operation, to ensure that further insects cannot be lured into the house. We recommend using the bug zapper for approx. 1 hour before using the room. Without distraction by human odours and light the insect will find their way into the trap more quickly.

The insects are killed quickly and painlessly by the integrated high voltage grid. The collection tray at the bottom of the device can be removed for easy cleaning.

The function of attracting flying insects is only given to insects that react to light.

### Additional information

- **Dimensions:** 33.6 x 26.4 x 7.2 cm (W x H x D)
- **Packaging dimensions:** 39.1 x 26.9 x 7.7 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, CZ
- **Product images, scenery images**
- **Packaging unit:** 2 units per package

### Specifications

- **Range:** 70 m<sup>2</sup>
- **High voltage grid:** 2000 – 2500 V
- **UVA fluorescent tubes**
- **Power:** 16 W
- **Power supply:** 220 – 240 V/50 – 60 Hz
- **ON/OFF switch**
- **Use:** Standing, wall and ceiling mounting, chain included
