Flying Insect Killer Professional LED

For a relaxing summer

Are you struggling with biting mosquitoes and annoying flies in your home? The Flying Insect Killer Professional LED from GAR-DIGO attracts pesky bugs with UV light, swiftly and painlessly eliminating them using its built-in high-voltage grid.

Insects indoors can be a real nuisance, especially during the summer months. When you ventilate in the evening, they quickly find their way into your living and sleeping areas—where they can really get on your nerves!

We recommend placing the device in a dark corner of the room, ideally when you're not nearby. With no distractions, insects will find their way to the light more quickly. Simply set it up in your bedroom 30 minutes before going to bed.

Afterward, it's best to place the device in the hallway to lure any remaining insects away from your bedroom.

Make sure to keep the windows shut while using the device—after all, you don't want to invite even more insects into your home! Enjoy a restful sleep, even in summer!

Effective only for flying insects that are attracted to light.

Additional information

- **Dimensions:** 33.6 x 25.4 x 7.3 cm (W x H x D)
- **Packaging dimensions:** 34.7 x 25.9 x 7.8 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 2 units per package

Specifications

- **Range:** 70 m²
- **High voltage grid:** 2200 – 2500 V
- **LED tubes**
- **Power:** 9 W
- **Power supply:** 220 – 240 V/50 – 60 Hz
- **ON/OFF switch**
