## UV-Light & Fan Insect Trap

For relaxed summer nights

The GARDIGO insect trap is used indoors and attracts flying insects with UV light. They are then sucked into the collection container by the built-in fan. This can be easily removed for emptying and cleaning.

The trap is powered by a USB power supply unit (not included). When travelling, e.g. in the caravan, it can also be used with a power bank.

In contrast to insect killers with high-voltage grids, there are no annoying odours with this type of insect trap. Catch insects in a clean and hygienic way!

The function of attracting flying insects is only given to insects that react to light.

### Additional information

- **Dimensions:** 12 x 18 x 12 cm (W x H x D)
- **Packaging dimensions:** 12.5 x 18.5 x 12.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT, CZ / DE, GB, CZ, SK, PL, RO, HR, BG
- **Product images, scenery images**
- **Packaging unit:** 50 units per package

### Specifications

- **Covered area:** max. 25 m<sup>2</sup>
- **Light emission:** 360°
- **Wavelength:** 365 nm
- **Power supply:** via USB (supply not included)
- **max 5 W/5V**
