

Art.-No. 667052

Clothes-Moth Trap

Monitoring system

Clothes moths prefer feeding on textiles made of fibres of animal origin. High quality wool jumpers, furs and down jackets are at the greatest danger. But even synthetic fibres can be fed on, even though they cannot be digested by the moths. Hair and skin particles which stick to the fibres and are an additional food source can make clothes, upholstery and even carpets attractive for the insects. The clothes-moth trap is a monitoring product that will help you discover an infestation early on. It attracts clothes moths with a pheromone.

Use: The traps are folded into triangle shape and set in places that are prone to moth infestation.

Attention! If medical advice is needed, have packaging or label available as reference. Keep out of reach of children. Store in a cool, dry place. Product can be disposed of with household waste.

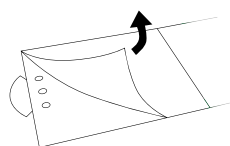

Additional information

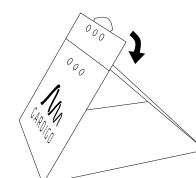

- **Dimensions as triangle:** 9 x 5.5 x 10.7 cm (W x H x D)
- **Packaging dimensions:** 9.3 x 14.4 x 2 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 12 units per package
